RAZIEL RENZ SALAMAT

3D CAD DESIGNER | CAD PRODUCTION | TECHNICAL DESIGN

Philippines | +63 91924 71080 | razielrenz@gmail.com | github.com/marmalade1124 | linkedin.com

PROFESSIONAL SUMMARY

Computer Engineering student with hands-on experience in CAD, modeling, technical drawings, and prototype development. Experienced in translating project needs, measurements, and requirements into accurate digital models and production-ready designs. Detail-oriented and comfortable working from references, specifications, and client or team instructions. Strong problem-solving skills with a systematic approach to revisions, documentation, and quality control. Adaptable to new CAD platforms and established design workflows.

TECHNICAL SKILLS

CAD & Design: Fusion 360 (Advanced), AutoCAD (Intermediate), 3D CAD Modeling (Advanced), Technical Drawing (Intermediate), Mechanical Design (Intermediate/Advanced), Enclosure & Assembly Design (Advanced), 3D Printing & Prototyping (Advanced)
Visualization & Design: Adobe Photoshop (Advanced), Graphic Design (Advanced), DaVinci Resolve (Intermediate)
Engineering & Development: Python (Intermediate), C (Intermediate), Arduino / Embedded Systems (Intermediate), MATLAB (Intermediate)
Core Strengths: CAD Modeling & Technical Design, Technical Drawing & Documentation, Mechanical Components & Assemblies, Prototype Development, Measurement & Dimensional Accuracy, Design Revisions, Problem Solving, Quality Control, Client & Team Communication

PROFESSIONAL EXPERIENCE

3D CAD Designer — 2024 – Present

Freelance

- Designed and developed 3D models, enclosures, mechanical components, and assemblies for engineering and student thesis projects.
- Created precise CAD drawings and detailed 3D models based on project requirements, measurements, references, and functional specifications.
- Translated concepts and design requirements into accurate digital models suitable for prototyping, fabrication, and presentation.
- Developed mechanical solutions involving enclosures, moving components, mounting systems, and electromechanical assemblies.
- Revised designs based on project feedback, dimensional requirements, and manufacturing constraints.
- Collaborated with clients and project teams to clarify requirements and deliver designs according to specifications.
- Applied attention to dimensions, tolerances, scale, component placement, and overall design accuracy.
- Prepared CAD models and technical designs for 3D printing and physical prototyping.

Graphic Designer — 2011 – Present

Freelance

- Created visual layouts, presentations, publication materials, and digital graphics based on client requirements and references.
- Translated client concepts and instructions into polished visual designs while maintaining the intended style and direction.
- Managed multiple projects and revisions while meeting deadlines and maintaining project standards.
- Communicated directly with clients to understand requirements, clarify revisions, and deliver final designs.

ENGINEERING & COMPUTER ENGINEERING PROJECTS

Coinnect – Automated Financial-Service Kiosk — 2020 – 2025

University of Mindanao – Tagum College

- Designed and developed an automated financial-service kiosk combining mechanical, electronic, and software components.
- Designed mechanical components and enclosure concepts for an integrated kiosk prototype.
- Created and refined CAD models to support mechanical assembly, component placement, and prototyping.

Additional Computer Engineering Projects

University of Mindanao – Tagum College

- Developed a smartphone-controlled drone integrating mechanical, electronic, and software components.
- Developed ChefMate, a restaurant management system focused on improving operational efficiency.
- Developed and evaluated watermarking applications using MATLAB for digital content protection.

EDUCATION

Bachelor of Science in Computer Engineering 2020 - Present
University of Mindanao – Tagum College Expected graduation: 2027

Science, Technology, Engineering and Mathematics (STEM) 2019 – 2020
University of Mindanao – Tagum College

LEADERSHIP & ADDITIONAL INFORMATION

- Senior Videographer, COLLEGIUM (2023 – 2026).
- Head Technical, Department of Student Government – Engineering (2024 – 2025).
- Junior Technical, Department of Student Government – Engineering (2023 – 2024).
- Available for part-time remote work with overlap in U.S. Pacific Time; open to graveyard schedule in the Philippines.
