RAZIEL SALAMAT

Concept to Creation

BS in COMPUTER ENGINEERING

FULL STACK DEVELOPER | CAD DESIGNER

3 Years of Experience in Programming and 3D Design

ABOUT ME

I’m a Computer Engineering graduate and multidisciplinary creative who enjoys turning ideas into functional, meaningful, and well-designed solutions. My experience spans web development, programming, electronics, 3D CAD design, graphic design, and video editing, allowing me to approach projects from both a technical and creative perspective.

I enjoy learning by building, whether it’s developing a website, designing a 3D model, programming an embedded system, or creating visual content. I’m always curious about how things work and how they can be made better.

For me, being a beginner isn’t a limitation. It’s an opportunity to explore, experiment, and grow. I’m constantly looking for new challenges where I can improve my skills, contribute to a team, and turn ideas into something real.

Adaptability is turning change into opportunity.

SKILLS

PROGRAMMING & SOFTWARE DEVELOPMENT

- Python
- JavaScript
- TypeScript
- React
- HTML & CSS
- REST APIs

ELECTRONICS & EMBEDDED SYSTEMS

- Arduino
- Raspberry Pi
- Embedded Systems
- Circuit Design
- Microcontrollers
- Electronics Prototyping

AI & MACHINE LEARNING

- PyTorch
- Machine Learning
- Computer Vision
- CNN
- Image Classification
- Object Detection

3D CAD & ENGINEERING

- Fusion 360
- 3D CAD Modeling
- Mechanical Design
- Product Design
- 3D Printing
- Prototyping

GRAPHIC & UI/UX DESIGN

- Graphic Design
- UI Design
- UX Design
- Visual Design
- Layout Design
- Branding

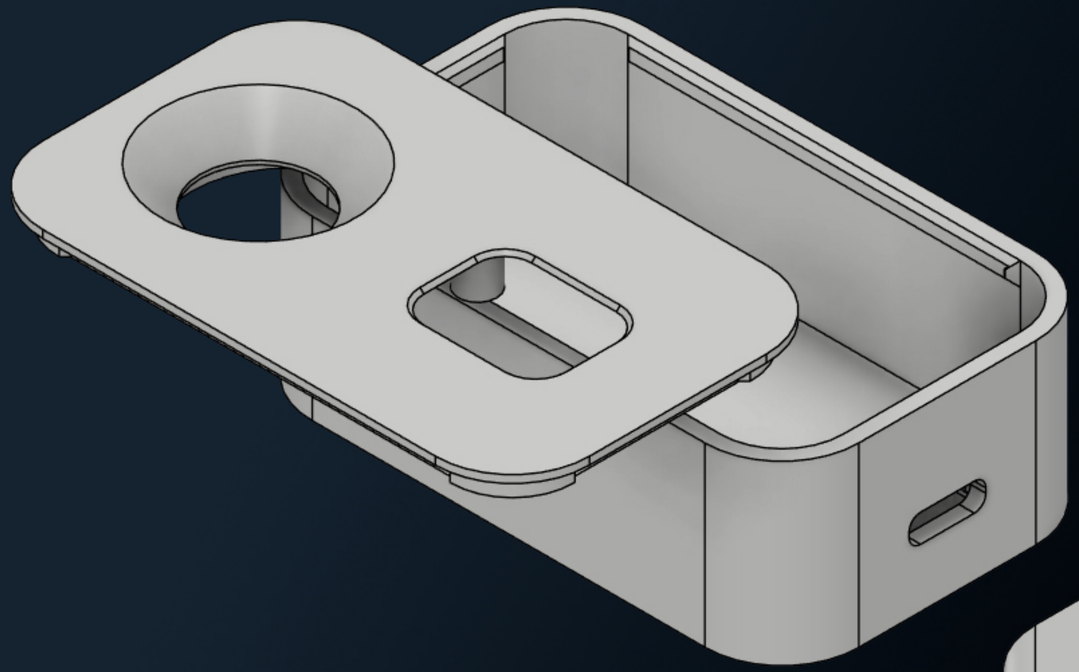
VIDEO & CREATIVE

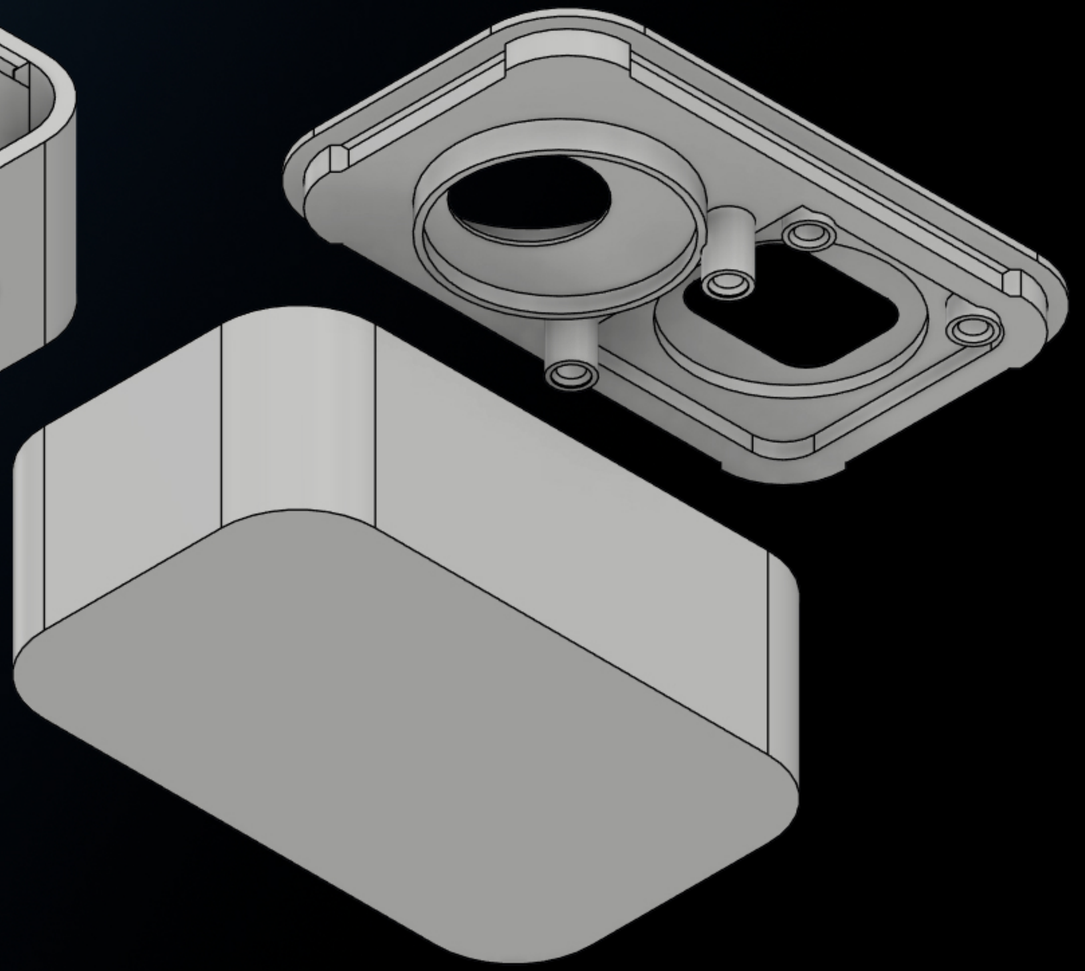
- Video Editing
- Video Production
- Content Creation
- Visual Storytelling
- Motion Graphics
- Digital Media

PROFESSIONAL SKILLS

- Adaptability
- Problem Solving
- Critical Thinking
- Creativity
- Attention to Detail
- Team Collaboration

ESPRESSO VISION





Recreated an exact scale and design of **ESPRESSO VISION** for a replacement request of a broken one by the client

Printed with PLA + by ESUN using the BAMBU A1 with 0.4 mm nozzle

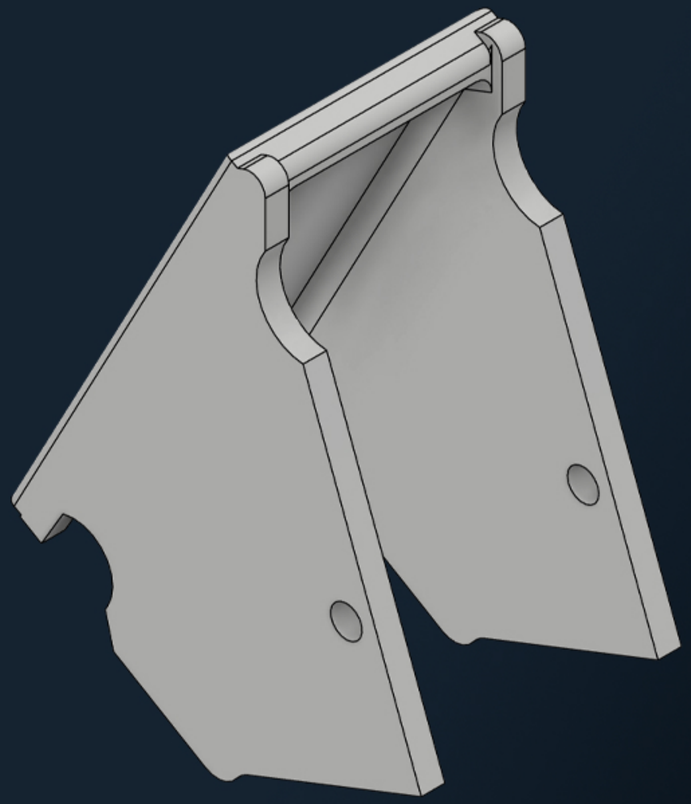
3D CAD DESIGNER

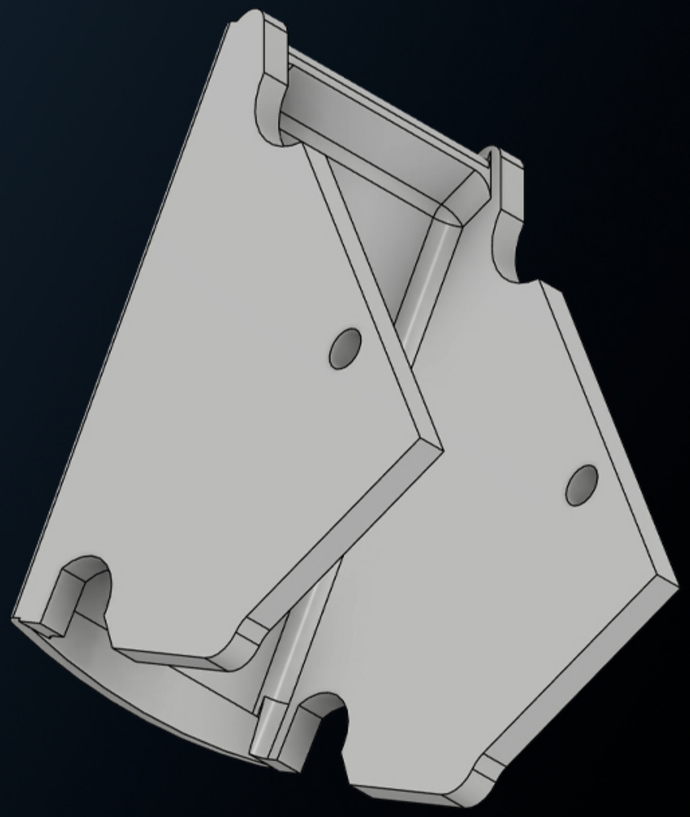
2024 - CURRENT

Designed with Fusion 360

Measured using Calipers

CUSTOM STEM COVER for TREK





Design a custom STEM Cover for a TREK Bicycle

Printed with PLA + by ESUN using the BAMBU A1 with 0.4 mm nozzle

3D CAD DESIGNER

2024 - CURRENT

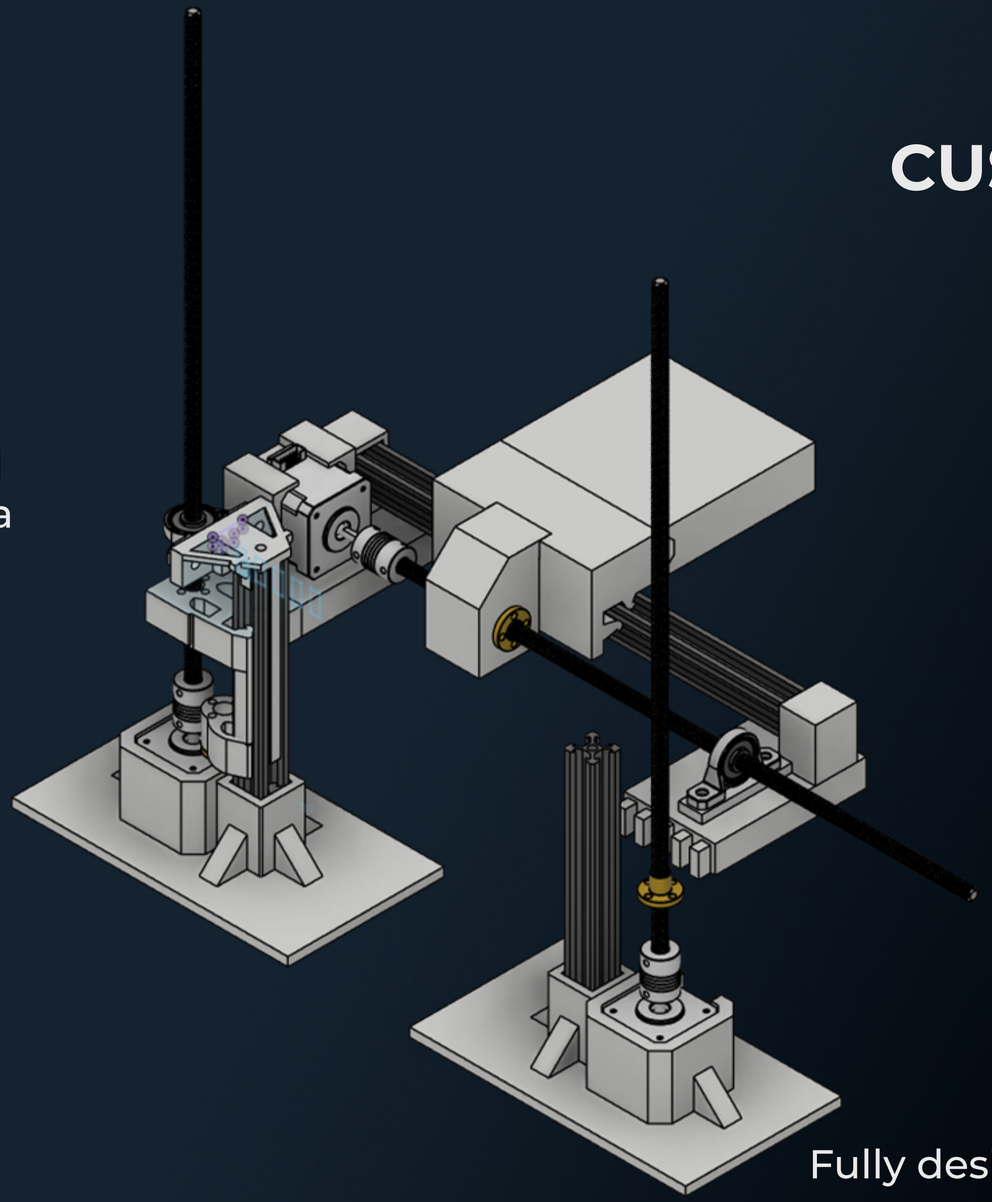
Designed with Fusion 360

Fit and Formed by Capturing a side profile and Making a 3D Version of it in Fusion 360

CUSTOM GANTRY

Designed a Custom Vertical and Horizontal Gantry for Coinnect, a Unified Financial Kiosk

Printed with PLA + by ESUN using the BAMBU A1 with 0.4 mm nozzle



Fully designed with optimization and efficiency in mind

3D CAD DESIGNER

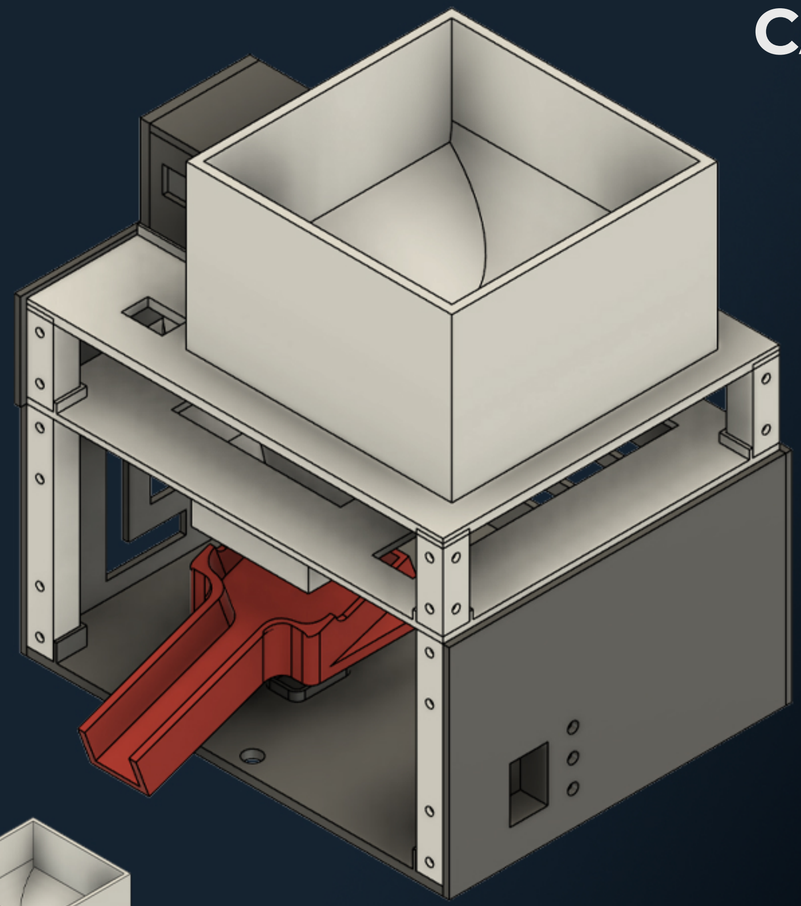
2024 - CURRENT

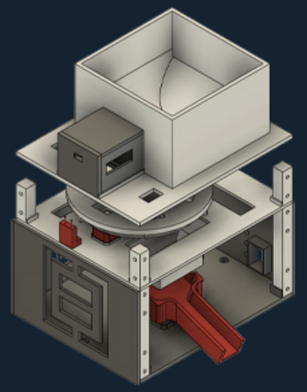
Designed with Fusion 360

CACAO SORTER

Designed a Fully Functional Cacao Sorter and Hopper with Machine Vision

Printed with PLA + by ESUN using the BAMBU A1 with 0.4 mm nozzle





3D CAD DESIGNER

2024 - CURRENT

Designed with Fusion 360

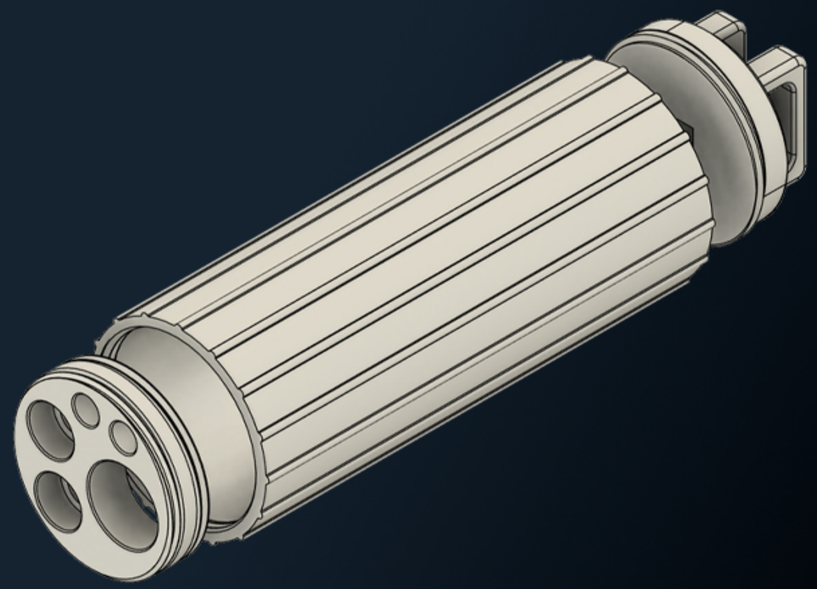
Cacao Sorting Machine Utilizing Machine Vision and Color Sensor.

CUSTOM CONTAINER

FOR WATER QUALITY AND MONITORING FOR WELLS

Custom Container for Water Monitoring
Built for Turbidity Sensor, PH Sensor
and TDS

Printed with PLA + by ESUN using
the BAMBU A1 with 0.4 mm nozzle



3D CAD DESIGNER

2024 - CURRENT

Designed with Fusion 360

Coated with Clear Epoxy for
Water Repellency and Gasket
Maker for Water Tight Holes

FULL STACK DEVELOPER

2023 - CURRENT

Designed and developed a modern, responsive website for **The Collegium**, the Official Student Publication of UM Tagum College

the collegium

https://thecollegium.vercel.app/

TECH STACK

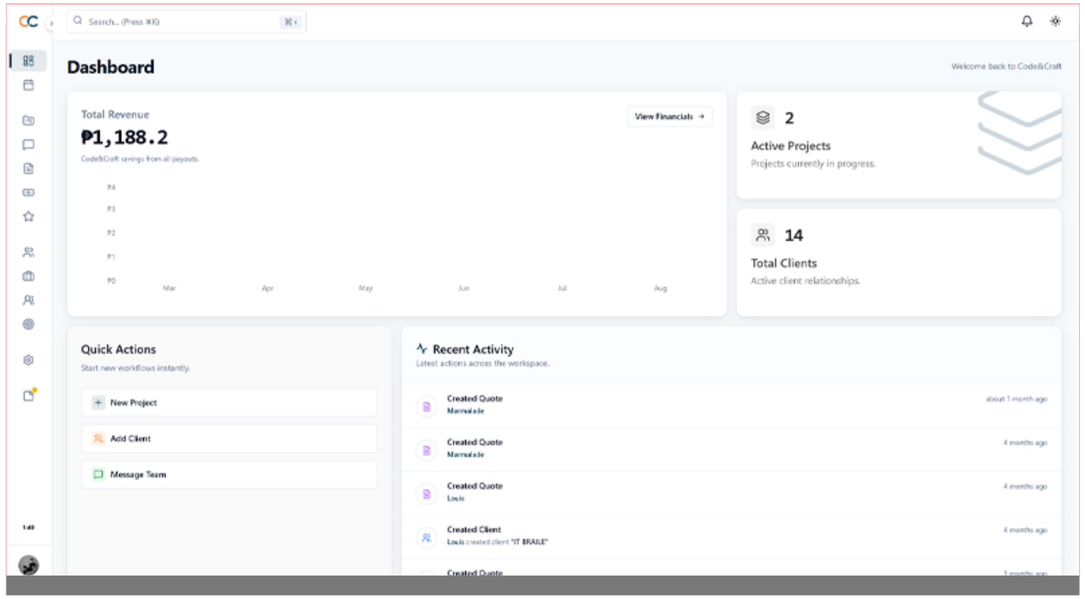
- React
- TypeScript
- HTML & CSS
- Tailwind CSS
- Supabase
- Vercel
- Git / GitHub

Developed the Fronted and Backend

FULL STACK DEVELOPER

2023 - CURRENT

Designed and developed a modern, all in one dashboard for **Code&Craft**

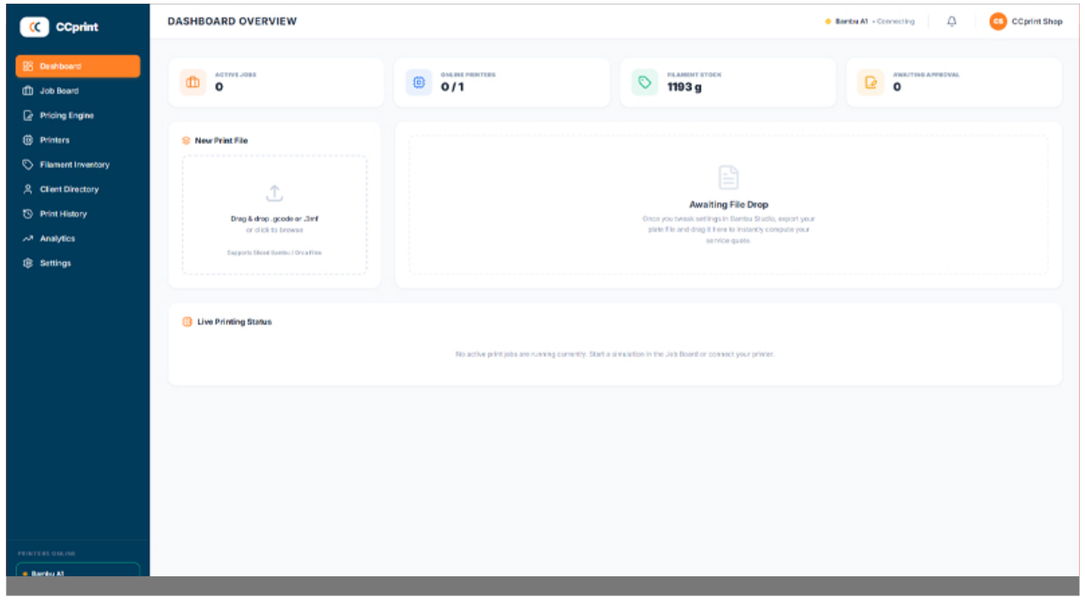


Manage clients, generate professional quotations, track projects, and collaborate with your team

FULL STACK DEVELOPER

2023 - CURRENT

PrintCC



Desktop-first management application built on Tauri v2, React, Vite, TypeScript, and Tailwind CSS

Designed to streamline operations for 3D printing service providers by connecting directly to 3D printers, automating quoting, managing client ledgers, tracking filament spools with logging, and providing real-time financial analytics.

https://github.com/marmalade1124/CCPrint

2023 - 2025 — **Senior Video Journalist**

The Collegium

2023 - 2025 — **Head Technical / Junior Technical**

Department of Student Government — Engineering

EDUCATION AND LEADERSHIP ROLES

Bachelor of Science in Computer Engineering — **2020 - 2026**

UM Tagum College

Senior High School (STEM) — **2019 - 2020**

UM Tagum College

WORK EXPERIENCE

3D CAD DESIGNER
CODE&CRAFT / FREELANCE

Designed and developed 3D CAD models and functional prototypes for Student Thesis and for clients, creating precise parts and assemblies for 3D printing and engineering applications. Worked on CAD design, dimensional adjustments, prototyping, and design optimization to turn concepts into practical, manufacturable models.

GRAPHIC DESIGNER
CODE&CRAFT / FREELANCE

Created digital graphics, promotional materials, and visual assets for various projects, focusing on clean layouts, visual consistency, and engaging designs. Developed designs for social media, branding, presentations, and digital platforms while adapting visuals to different audiences and formats.

VIDEO EDITOR
FREELANCE

Edited short-form and long-form video content, focusing on pacing, transitions, visual storytelling, and overall presentation. Created engaging videos by combining video footage, graphics, music, captions, and effects tailored to different content styles and platforms.

PROGRAMMER
FREELANCE

Developed software, websites, and electronics-based projects using Python, Arduino, and Raspberry Pi. Designed and programmed embedded systems, sensor integrations, automation solutions, and hardware prototypes, while building functional web applications and connecting software with real-world electronic systems.
